Review

Cellular responses to DNA damage in the yeast *Saccharomyces cerevisiae* (MTR 06290)
H.J. Burtscher, A.J. Cooper and L.B. Couto (U.S.A.) 1

Research Papers

A new mutagen-sensitive mutant in Neurospora, *mus-16* (MTR 06280)
H. Inoue and A.L. Schroeder (Japan, U.S.A.) 9

Effects of 3-aminobenzamide on the rejoining of DNA-strand breaks in mammalian cells exposed to methyl methanesulphonate; role of poly(ADP-ribose) polymerase (MTR 06281)
G. Ahnström and M. Ljungman (Sweden) 17

Comparison of induction and repair of adducts and of alkali-labile sites in human lymphocytes and granulocytes after exposure to ethylating agents (MTR 06282)
H.H. Schutte, G.P. Van der Schans and P.H.M. Lohman (The Netherlands) 23

Intragenic suppression in the *uvrD* gene of *Escherichia coli*. I. Temperature-sensitive *uvrD* mutations (MTR 06283)
Y. Yamamoto, M. Yabuki and J.-i. Furuyama (Japan) 39

Photorepair of ultraviolet radiation-induced pyrimidine dimers in corneal DNA (MTR 06284)
R.D. Ley, L.A. Applegate and S.E. Freeman (U.S.A.) 49

Inactivation by nitrogen mustard of plasmids introduced into normal and Fanconi's anaemia cells (MTR 06285)
S.W. Dean, H.R. Sykes and A.R. Lehmann (Great Britain) 57

Low levels of DNA excision repair in undamaged bovine lymphocytes (MTR 06286)
T.J. Schrader and I.G. Walker (Canada) 65

DNA repair synthesis in primary culture of bovine bile duct epithelial cells induced by chemical agents in relation to bile duct cancer (MTR 06288)
M. De Lü, K. Miyazaki, S. Yoshitomi and F. Nakayama (Japan) 73

Announcements 81

Research Papers

Radiation-induced recovery processes in cultured marsupial cells (MTR 06287)
R. Overberg, G. Chandrasena and C.S. Rupert (U.S.A.) 83

Repair of DNA single-strand and double-strand breaks in the Chinese hamster xrs 5 mutant cell line as determined by DNA unwinding (MTR 06289)
N.D. Costa and P.E. Bryant (Great Britain) 93

Detection of DNA damage and repair by alkaline elution using human lymphocytes (MTR 06291)
J.S. Munzer, S.K. Jones, J.P. O'Neill, J.N. Hartshorn and S.H. Robison (U.S.A.) 101

SOS independent survival against mitomycin C induced lethality in a rifampicin-nalidixic acid-resistant mutant of *Escherichia coli* (MTR 06292)
K.R. Kumaresan and R. Jayaraman (India) 109

Survival and mutagenic responses of mitomycin C-sensitive mouse lymphoma cell mutants to other DNA cross-linking agents (MTR 06293)
H. Hama-Inaba, K. Sato and E. Moustacchi (Japan, France) 121

A mutation in the DNA adenine methylase gene (*dam*) of *Salmonella typhimurium* decreases susceptibility to 9-aminoacridine-induced frameshift mutagenesis (MTR 06294)
L. Ritchie, D.M. Podger and R.M. Hall (Australia) 131

Excision repair of pyrimidine dimers in human peripheral blood lymphocytes: Comparison between mitogen stimulated and unstimulated cells (MTR 06295)
S.E. Freeman and S.L. Ryan (U.S.A.) 143

The induction of *rho*$^-$ mutants by UV or γ-rays is independent of the nuclear recombinational repair pathway in *Saccharomyces cerevisiae* (MTR 06296)
M. Heude (France) 151

0167-8817/88/$03.50 © 1988 Elsevier Science Publishers B.V. (Biomedical Division)

Identification of a new seventh complementation group of UV-sensitive mutants in Chinese hamster cells (MTR 06297)
M.Z. Zdzienicka, G.P. Van der Schans and J.W.I.M. Simons (The Netherlands) 165

An analysis of the mutagenicity of 1,2-dibromoethane to *Escherichia coli*: Influence of DNA repair activities and metabolic pathways (MTR 06298)
P.L. Foster, W.G. Wilkinson, J.K. Miller, A.D. Sullivan and W.M. Barnes (U.S.A.) 171

DNA double-strand damage and repair following γ-irradiation in isolated spermatogenic cells (MTR 06299)
T.P. Coogan and I.Y. Rosenblum (U.S.A.) 183

Repair of the plasmid pBR322 damaged by γ-irradiation or by restriction endonucleases using different recombination-proficient *E. coli* strains (MTR 06300)
M. Bien, H. Steffen and D. Schulte-Frohlinde (F.R.G.) 193

Complementation of the DNA-repair defect in a CHO mutant by human DNA that lacks highly abundant repetitive sequences (MTR 06301)
A.M. Dulhanty, J.S. Rubin and G.F. Whitmore (Canada, U.S.A.) 207

Polyclonal antibodies against O^6-methylguanine–DNA methyltransferase in adapted bacteria (MTR 06302)
J. Ceccoli, N. Rosales, M. Goldstein and D.B. Yarosh (U.S.A.) 219

The induction and repair of lesions produced by the photolysis of (6–4) photoproducts in normal and UV-hypersensitive human cells (MTR 06303)
D.L. Mitchell (U.S.A.) 227

Characterization of an X-ray-hypersensitive mutant of V79 Chinese hamster cells (MTR 06304)
M.Z. Zdzienicka, Q. Tran, G.P. Van der Schans and J.W.I.M. Simons (The Netherlands, Vietnam) 239

Radiosensitive Down syndrome lymphoblastoid lines have normal ionizing-radiation-induced inhibition of DNA synthesis (MTR 06305)
M.B. Ganges, R.E. Tarone, H. Jiang, C. Hauser and J.H. Robbins (U.S.A.) 251

Equivalence of UDS responses for established cell lines and primary cells derived from the *mei-9*^{a} and *mus201*^{D1} excision repair-deficient strains of *Drosophila melanogaster* (MTR 06306)
R.L. Dusenbery and S.-F. Lee-Chen (U.S.A.) 257

Establishment of a monoclonal antibody recognizing ultraviolet light-induced (6–4) photoproducts (MTR 06307)
T. Mori, T. Matsunaga, T. Hirose and O. Nikaido (Japan) 263
